Project Name	Persnalized Networking Assistant
Maximum Marks	5 Marks

Solution Architecture Diagram:

Provide a high-level visual representation of your solution's architecture. Use the structural layout below as a template to map out your Presentation Layer, Application Layer, and Data Layer. Fill in the specific technologies and components for your project directly into the boxes to create your architectural diagram.

Component Description Table

Component Name	Description / Role in Architecture	Technologies Used
[Presentation Layer]	Provides the Streamlit user interface for entering user profile details and displaying AI-generated networking suggestions.	Python, Streamlit
[API Gateway]	Receives requests from the frontend, validates data, routes API calls, and returns responses.	FastAPI, Pydantic
[Microservices]	Processes user information, extracts themes using DistilBERT, generates networking messages using GPT-2, performs fact checking using Wikipedia API, and manages history and feedback.	Python, DistilBERT, GPT-2, Wikipedia API

<i>[Database]</i>	<i>Stores conversation history and user feedback locally for future reference.</i>	<i>JSON Files</i>
