Maximum Marks	3 Marks

Project Executable Files

This section requires submission of all executable and deployable files for your project. Ensure all files are properly organized, named, and uploaded to the specified submission platform. The evaluator must be able to run or deploy your solution using the provided files and instructions.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	YES
2	README / Setup Guide (instructions to run the project)	YES
3	requirements.txt / package.json / dependency file	YES
4	Database schema / seed files (if applicable)	YES
5	Environment configuration file (.env.example or similar)	YES
6	Deployed application URL (if hosted)	YES
7	APK / Executable binary (if applicable for mobile/desktop apps)	YES
8	Dockerfile / Containerization config (if applicable)	YES
9	Test files and test results	YES

10	Demo video or walkthrough (if required)	YES
----	---	-----

Step 2: File / Folder Structure

Provide an overview of your project's file and folder structure below:

Personalized-Networking-Assistant

```
|
|  └─ main.py
|    └─ FastAPI backend application
|
|  └─ app.py
|    └─ Streamlit user interface
|
|  └─ topic_generator.py
|    └─ Generates networking conversation starters
|
|  └─ fact_checker.py
|    └─ Performs topic verification
|
|  └─ event_analyzer.py
|    └─ Extracts important event themes
|
|  └─ history.json
|    └─ Stores generated messages
|
|  └─ feedback.json
|    └─ Stores user feedback
|
|  └─ requirements.txt
|    └─ Required Python libraries
|
└─ README.md
  └─ Project documentation
```

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	Local Deployment

Login Credentials (Demo)	Not Required
Platform / Hosting Provider	Localhost
Repository Link	GitHub Repository Link
Demo Video Link	To be added

Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run your project locally:

Pre-requisites:

- Python 3.10 or above installed
- Visual Studio Code installed
- Internet connection required for API access
- Required Python libraries installed using requirements.txt

Steps to Run the Project:

Step 1:

Clone or download the project repository.

Step 2:

Open the project folder in Visual Studio Code.

Step 3:

Install required dependencies.

Step 4:

Start the FastAPI backend server.

Step 5:

Open another terminal and start the Streamlit frontend.

Step 6:

Open the application in the browser.

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	Requires internet connection for external API based features	Ensure stable internet connection
2	AI generated suggestions may vary for different inputs	Users can regenerate suggestions with updated profile details
3	Application currently runs locally and is not deployed on cloud	Future enhancement: deploy using cloud platforms
